¹Contribution 2C94-18 from the Prince William Sound area. The Regional Information Report Series was established in 1987 to provide an information access system for all unpublished Divisional reports. These reports frequently serve diverse ad hoc informational purposes or archive basic uninterrupted data. To accommodate timely reporting of recently collected information, reports in this series undergo only limited internal review and may contain preliminary data; this information may be subsequently finalized and published in the formal literature. Consequently, these reports should not be cited without prior approval of the author of the Commercial Fisheries Management and Development Division.

AUTHORS

Leah Merritt is an Administrative Clerk II for the Alaska Department of Fish and Game, Commercial Fisheries Management and Development Division, Prince William Sound, P.O. Box 669, Cordova, AK 99574.

Daniel Sharp is an Assistant Area Management Biologist for the Alaska Department of Fish and Game, Commercial Fisheries Management and Development Division, Prince William Sound, P.O. Box 669, Cordova, AK 99574.

ACKNOWLEDGEMENTS

The Alaska Department of Fish and Game, Computer Services section, developed the Fish Ticket System (Version 8.1) used to generate the following reports. The system is written in Realia COBOL, except for the panels where SCREENIO was used. Programmers included Denny Johnson, Carmine DiCostanzo, Ann Graham and Terry Smith. Terry Smith modified the management reporting subsystem originally written by Ann Graham. The authors would like to express special appreciation to Denny Johnson and Terry Smith of Computer Services who both were available to answer questions throughout the data entering and final report generating.

ABSTRACT

This report provides catch and effort statistics for the 1994 salmon and herring fisheries in the Prince William Sound Management Area. The data base is derived from fish ticket reports of salmon and herring sales and organized using a data base software package provided by the Computer Services section of the Division of Commercial Fisheries. The program's fish ticket reporting subsystem created the summary tables which were imported into Lotus 123 ver. 3.1 for final editing. Prince William Sound produced a harvest of 40,565,555 salmon in 1994. Catch by species included 48,558 chinook, 1,514,329 sockeye, 1,058,154 coho, 36,886,301 pink and 1,058,213 chum salmon.

KEY WORDS: Prince William Sound Management Area, herring, salmon, catch, landings, effort

INTRODUCTION

The Prince William Sound Management Area encompasses the coastal waters and inland drainage of the northern Gulf of Alaska between Cape Suckling and Cape Fairfield (Figure 1). The area includes the Bering River, Copper River and Prince William Sound along with a total adjacent land area of approximately 38,000 square miles.

The Prince William Sound area consists of eleven management districts and 55 statistical areas which correspond to the local geography and distribution of the five species of salmon harvested by the commercial fishery (Figures 2 through 10). The management objective for all districts is the achievement of desired escapement goals for major species while also allowing for the orderly harvest of all fish surplus to spawning requirements.

Legal gear for the salmon fishery includes purse seines and both drift and set gillnets. Drift gillnet fishermen are the most numerous and are permitted to fish in the Bering River, Copper River, Coghill, Unakwik and Eshamy Districts. Set gillnet gear is legal only in the Eshamy District. Purse seine gear is legal in the Eastern, Northern, Unakwik, Coghill, Northwestern, Southwestern, Montague and Southeastern districts.

There are five hatcheries in the Prince William Sound Management Area: Solomon Gulch Hatchery in the Eastern District (Figure 3), Cannery Creek Hatchery in the Northern District (Figure 4), Wally Noerenberg Hatchery in the Coghill District (Figure 5), Main Bay Hatchery in the Eshamy District (Figure 7), and Armin F. Koernig Hatchery in the Southwestern District (Figure 8). In 1994, cost recovery harvests to defray operating costs totaled 11,004,641 salmon, mostly pink salmon.

The Prince William Sound area has five different herring fisheries. The Prince William Sound Herring Management Plan defines the herring management year as July 1 through June 30. However the herring catches presented in this report are from the 1994 calendar year. The sac roe fisheries occur in the spring and the food-and-bait fishery is in the fall. The harvest of naturally occurring herring spawn on kelp and the food-and-bait fishery do not require a limited entry permit; all other herring fisheries do.

METHODS

A fish ticket is generated each time a commercial fisherman sells his or her catch in the Prince William Sound Management Area. These tickets are legal documents and are required by regulation. The Cordova office of the Alaska Department of Fish and Game receives the fish tickets from buyers and then enters them into the Fish Ticket System.

The Fish Ticket System, designed by Commercial Fisheries Computer Services, is a system which includes programs for:

- (1) entry of commercial fisheries fish ticket data,
- (2) correction of fish ticket records,
- (3) transfer of fish tickets to centralize the state database,
- (4) providing reporting data to area office and regional staff,
- (5) various utilities to help accomplish the above and to maintain the database efficiently.

Computer Services also provides an Operators Manual which describes the functions of the components of the system (ADF&G 1989).

The two main goals of the Fish Ticket System are to provide access to the fish ticket data at the Cordova office and to provide error-free transfer of data to Divisional Headquarters for inclusion in the statewide database.

Once a fish ticket reaches the Cordova office, Department staff edits, batches and keys into the computer the fish ticket information. In support of these activities, editing tables and verification reports are maintained.

RESULTS

In the Prince William Sound Management Area 40,565,555 salmon were landed in 1994 (Tables 1, 2 and 3). Of the 541 drift gillnet permit holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 510 or 94 percent made at least one landing in 1994. Drift gillnets landed a total of 3,199,288 salmon. Tables 4 through 39 detail the drift gillnet catch by district, statistical area, by period, catch date or statistical week.

Of the 30 salmon set gillnet holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 26 or 87 percent made at least one landing in 1994. Set gillnets landed 416,343 salmon. Tables 40 through 42 detail the set gillnet catch by district, statistical area, period, catch date or statistical week.

Of the 270 salmon purse seine holders (Commercial Fisheries Entry Commission, Juneau, personal communication), 171 or 63 percent participated in the 1994 season by making at least one landing. Purse seines landed in 1994 a total of 25,881,748 salmon. Tables 43 through 90 detail the purse seine catch by district or statistical area, by period, catch date or statistical week.

The hatcheries in Prince William Sound sold 11,004,641 salmon. Roe sales are footnoted by hatchery. Tables 91 through 95 detail the hatchery sales by district and catch date.

The Cordova High School has a special use educational permit. This special use permit was not used this year.

For 1994, the Board of Fisheries passed regulation 5 AAC 24.356 requiring all chinook salmon caught and retained for personal use in the Copper and Bering River Districts to be reported on fish tickets. Tables 96 and 97 show this catch.

Table 98 lists the salmon confiscated by the state; 39 salmon were confiscated for illegal fishing violations.

The ADF&G harvested 63,496 salmon for stock composition test fisheries. Table 99 details that catch by day.

In April, the estimated herring spawning biomass was below the minimum threshold level needed to open any of the herring fisheries in Prince William Sound. Therefore, no herring fishery was conducted in 1994. Herring test fishery sales are presented in table 100. There are 107 herring purse seine sac roe permit holders, 24 herring drift gillnet sac roe permit holders and 128 pounded spawn-on-kelp permit holders (Commercial Fisheries Entry Commission, Juneau, personal communication).

Beginning in 1989, harvest codes were included in fish ticket information to help specify the type of harvest. In 1994 the following harvest codes were used: 11 - traditional common property fisheries, 18 - confiscated catch, 21 - private hatchery harvest, and 42 - test fishery for a special study.

Beginning in 1992, delivery codes were included in fish ticket information to help specify the type of delivery. In 1994 the following delivery codes were used: 1- whole fish/food fish, 95- Home Use and 99- Discarded.

The Department altered the Copper River District's (District 212) statistical area boundaries in 1988. Before 1988 there were only three statistical areas describing the district (212-10, 212-20, and 212-30). The Department's revised six statistical areas (212-11, 212-15, 212-21, 212-25, 212-31, 212-35) are used to document inside and outside area catches within the original pre-1988 boundaries.

The Unakwik District (District 229) statistical area code was changed in 1989 to reflect consistency in district coding convention. Prior to this time it was the only district in the Prince William Sound Management Area that did not have a unique three digit district code. In 1991, one new statistical area (222-35) was created in the Northern District. This new area encompasses what previously was statistical area 224-20, and portions of 222-30 and 224-40.

When using the following tables, be aware there could be some inaccuracies associated with locations and catches as reported on fish tickets.
